

Weather Forecast Monday 24 July 2017 Issue at 10.00 am.

Synoptic Situation at 07.00 A.M

At 04 a.m. LST today (24 July), the tropical storm “SONCA” over the upper South China Sea was centered about 500 kilometers east of Hanoi, Vietnam or latitude 17.2 degree North, longitude 111.3 degree East. It is moving almost stationary with maximum sustained wind about 35 knots or 65 km/hr. It is expected make landfall over upper Vietnam on 25 July and move to the Northeast and the North. Abundant rain with isolated heavy to very heavy rain over country.

The strong southwest monsoon prevails over the Andaman Sea and Thailand. The strong winds in the upper Andaman Sea and the Gulf of Thailand lead to waves 2-3 meters high. People should beware of severe conditions. All ships should proceed with caution and small boat in the Andaman Sea keep of shore. All travelers should stay tuned for the weather update.
